Stacking bin - 600 x 400 x H 225 mm - closed handgrips - smooth base - blue

Product specifications

External (LxWxH)	600 × 400 × 225 mm
Internal (LxWxH)	537 × 358 × 220 mm
Capacity	40 litre
Handles	Closed
Sidewalls	Closed
Material	HDPE
Article number	7905.750.623
Weight (kg)	2,3 kg
Temperature range	-30°C to +40°C, briefly up to +90°C
Color	Blue
Bottom	Closed, smooth
Quantity per pallet	36

Features

- **Very robust plastic stacking bin from the UNIBOX series. Dimensions 600 x 400 x H 225 mm**
- **With thick walls and a heavy-duty base for high impact resistance and a long service life**
- **Optimal hygiene thanks to minimal external ribbing**
- **With generously rounded internal corners for easy emptying and cleaning**
- **With a lowered upper rim on both short sides for good ventilation of the contents**
- **Widely used in the food industry and pharmaceutical sector**
- **Hygienic and easy to scoop contents from**
- **Ideal for fresh produce and bulk goods such as seeds, nuts and peanuts**
- **Multifunctional use: as a storage bin, transport bin, bin for fresh produce and as a freezing bin - particularly the lower models**
- **Options: printing - loose-fit lid**

Description

UNIBOX stacking bin in Euronorm format (**600 x 400 x H 225 mm** - 40 liter). Fully closed and hygienically designed, with **smooth walls** and a **smooth base**. The handgrips are designed as practical **recessed handgrips** for easy handling.

Product details

UNIBOX stacking bins are particularly robust, with a **substantial upper rim** and a **reinforced base** that remains flat and smooth. The walls also feature a high wall thickness and only minimal external ribbing. Thanks to this **smooth structure**, UNIBOXES are particularly **easy to clean** and highly hygienic.

The **generously rounded internal corners** provide an additional advantage. The large corner radii allow the bin to be **emptied easily** and then **cleaned** efficiently.

A **lowered section** is incorporated into the upper rim on the short sides above the handgrips. This lowered section supports good **ventilation** or **cooling** of the contents.

Applications

UNIBOX stacking bins are widely used in the **food industry** and **pharmaceutical sector**. Their robustness and excellent hygiene properties are important advantages in these applications. The UNIBOX is also frequently used for **fresh produce** that needs to “breathe”, and even for **freezing** products.

The heavy-duty wall and base construction allows this without difficulty, while the **lowered upper rim** supports good **ventilation** and cooling. Finally, the generous **rounded internal corners** make it easy to **empty** chilled products and frozen goods.
