Weight (kg)	9,9 kg
Color	Green
Quantity per pallet	13

Features

The waste container is fitted with two wheels Ø 200 mm, with rubber tread.

Availiable in different colours.

Description

Mobile green 120-liter container with an insertion opening in the lid. Used for collecting empty PET bottles and cans with a deposit. The official mini bag available from the wholesaler fits perfectly into this collection container. Simply hang this mini bag collection sack in the container. Thanks to the insertion opening, the lid does not need to be touched or opened when depositing the PET bottle. A hygienic solution for collection containers in company canteens, schools, and institutions. The collection container is lightweight and easy to move with ergonomically designed handles. Text or logo printing is available upon request. Examples of prints include 'Deposit your empty PET bottle here' or 'Deposit your PET bottle and support your football club.' Choose the printing option when ordering, and we will contact you. The mini bags for the collection container are available for free at your beverage wholesaler. The mini bags come with a sealing strip. Full collection bags are closed with a sealing strip, labeled with a barcode, and handed over to the beverage wholesaler's driver. They manage the logistics of the returned PET bottles. Statiegeld Nederland is responsible for counting and administratively processing the deposit bottles. The returned deposit bottles are recycled.
