

Pallet box BIG BOX - 1200 × 1000 mm - closed - 3 runners - grey

Product specifications

External (LxWxH)	1200 × 1000 × 790 mm
Internal (LxWxH)	1110 × 910 × 610 mm
Capacity	670 liter
Sidewalls	Closed
Material	HDPE
Article number	4401.300.502
Weight (kg)	45,5 kg
Temperature range	-30°C to +40°C, briefly up to +90°C
Color	Blue
Bottom	Closed, reinforced
European Article Number	7424905658624
Colorcode	RAL 7040
Max. load capacity per box	500 kg
Max. static stacking load	4500 kg
Max. dynamic stacking load	1000 kg
Quantity per pallet	4

Features

Dimensions: 1200 × 1000 × H790 mm - capacity: 670 litre

Equipped with 3 pallet runners

Closed side walls, reinforced base - for safe storage

Unique design with convex panels for up to 10% extra volume

Very robust pallet box - widely used, with various options (see below)

Specifically designed for durability, efficiency and versatility

1" and 2" outlet fittings on one short side and one long side - for flexibility

Available in grey, red, blue, green, orange and yellow

Ideal for various sectors, including the food industry, warehouses and logistics

Also widely used as a collection bin for metals and used batteries, etc.

Options: lid - hinged lid - printing - QR codes or barcodes - runner reinforcements - runner fixing bolts - dividers - drop door - mobile version - perforated version - loose runners - check taps - screw plugs

Description

The BIG BOX is a particularly robust plastic pallet box (1200 × 1000 × H790 mm – 670 litre) that has proven itself across a wide range of applications. Because the box is food-grade, it is primarily used in the food industry. The wide variety of available colours is also important for this sector, allowing different applications or departments to be distinguished - crucial for preventing contamination. Thanks to its convex, outward-bulging walls, a BIG BOX offers up to 10% more volume than conventional pallet boxes. This is a major advantage for loose products or bulk goods. An additional benefit is that the convex panels act as a buffer in the event of impacts, resulting in less damage. The aspect of "damage" also played a role in the decision to make the pallet runners removable. If damaged, the runners can be replaced so the box can function optimally again. Thanks to these positive product features, our BIG BOX is now used in virtually every sector: from European wine growing to pharmaceuticals, and from construction to the recycling industry - for example, for collecting used batteries.
