Description

Plastic bottle crate (300 x 200 x H304 mm) in black. **Equipped with a fixed 6-compartment divider** for bottles or jars with a **maximum diameter of 92 mm** and a **maximum height of 280 mm**.

Application

Suitable for organised storage and safe transport of up to six bottles or jars. The **integrated compartment divider** keeps the bottles and jars separated and **reduces the risk of damage** during transport.

Product details

The individual compartments measure 92 x 92 mm and are suitable for bottles and jars with a maximum height of 280 mm. Thanks to the four open hand grips, the bottle crate can be easily lifted and carried from all sides. Its compact footprint also enables efficient storage where space is limited.

The bottle crate is made from robust recycled HDPE. The recycled material is wear-resistant and suitable for use with packaged food products. Our bottle crates are used intensively every day in warehouses, production environments and during transport, both at ambient and refrigerated temperatures. The crate is temperature resistant from -30 °C to +40 °C and can withstand temperatures of up to +90 °C for short periods.
