

Bottle crate 300 x 200 x H 304 mm - 6 compartments - black

Product specifications

External (LxWxH)	300 × 200 × 304 mm
Internal (LxWxH)	278 × 180 × 288 mm
Color	Black
Handles	Open
Sidewalls	Perforated
Material	Recycled HDPE
Article number	30.927.00.A
Weight (kg)	1,09 kg
Temperature range	-20°C to +50°C, briefly up to +90°C
Bottom	Perforated
Stacking height (mm)	300

Features

For storing and transporting up to six bottles

Suitable as a cider crate

Also suitable for matching wine and beverage bottles

Suitable for bottles of up to approximately 1 litre, depending on the bottle dimensions

Description

The black bottle crate in the compact 300 x 200 mm format is suitable for the organised storage and safe transport of up to six bottles. It can be used as a cider crate and is also suitable for certain wine and beverage bottles, provided their dimensions match the compartment size and maximum bottle height.

The six integrated compartments keep the bottles separated during storage and transport. This prevents the bottles from knocking directly against each other and reduces the risk of damage. Each compartment measures 93 mm. The maximum bottle height is 280 mm.

Thanks to the four open handles, the bottle crate can be easily picked up and carried from all sides. With a stacking height of 300 mm, it can be stored stably while saving space. The compact base dimensions of 300 x 200 mm allow efficient use of the available storage and transport space.

The bottle crate is manufactured from robust recycled HDPE. The recycled material is durable and suitable for everyday use in storage, production and transport environments. The crate is temperature resistant from -20 °C to +50 °C and can briefly withstand temperatures of up to +90 °C.
