

Bottle crate 300 x 270 x H 240 mm - 12 compartments - black

Product specifications

External (LxWxH)	300 × 270 × 240 mm
Internal (LxWxH)	281 × 242 × 225 mm
Color	Black
Handles	Open
Sidewalls	Perforated
Material	Recycled HDPE
Article number	30.925.00.A
Weight (kg)	1,04 kg
Temperature range	-20°C to +50°C, briefly up to +90°C
Bottom	Perforated

Features

For storing and transporting up to twelve bottles

Compact format for space-saving storage

Integrated compartment dividers for keeping bottles separated

Suitable for bottles of up to approximately 0.5 litres, depending on the bottle dimensions

Description

The black bottle crate with external dimensions of 300 x 270 x H 240 mm is suitable for the organised storage and safe transport of up to twelve bottles. It is intended for bottles with a capacity of approximately 0.5 litres, provided their dimensions match the compartment size and maximum bottle height.

The twelve integrated compartments keep the bottles separated during storage and transport. This prevents them from knocking directly against each other. It reduces the risk of scratches and damage while ensuring the bottles remain neatly positioned. Each compartment measures 70 mm. The bottle crate is designed for bottles with a maximum height of 217 mm. Thanks to the four open handles, it can be easily picked up and carried from different sides. Its compact format allows efficient use of the available storage and transport space.

The bottle crate is manufactured from robust recycled HDPE. The recycled material is durable and suitable for regular use in storage, production and transport environments. The crate is temperature resistant from -20 °C to +50 °C and can briefly withstand temperatures of up to +90 °C.
