Printing possible

Distribution Bin 600 x 400 x H265mm - Integra

Product specifications

External (LxWxH)	600 x 400 x 265 mm
Internal (LxWxH)	529 x 345 x 246 mm
Capacity	46 liter
Handles	Solid
Sidewalls	Solid
Material	PP
Article number	1310.851.626
Weight (kg)	3,1 kg
Temperature range	- 20 to +40
Color	Blue
Bottom	Smooth
Max. load capacity per box	53 kg
Max. static stacking load	400 kg
Surface	Closed
Load capacity (kg)	53
Quantity per pallet	64

Features

Product Protection: Protects products from pollution and contamination. Security seals and strappable lids ensure safe and secure transportation.

Automation-Friendly: Designed for automated handling, with lids allowing automatic opening and a smooth flat base for conveyor belt operation.

Efficient Lid Design: Integrated interlocking lid prevents lid loss, and lids hang vertically when open.

Content Identification: Ticket window and textured areas for easy removal of adhesive labels, allowing clear content identification.

Space-Saving: Stack- and nestable design saves valuable space on return transport.

Compatibility Note: Not compatible with the Kaiman range.

Description

The Integra Classic distribution bin of 600 x 400 x 265 mm provides a safe and efficient way to transport and store products. This bin protects goods from contamination and damage, which is particularly important for non-food, e-commerce, and retail applications. Thanks to the lid and sealing options, products remain securely closed during transport.

The design is tailored for automated processing. The flat base ensures smooth operation on conveyor belts, while the lids can be automatically opened. The bumpers on the ends help prevent stacking on conveyor belts, making the bin highly suitable for logistical processes.

A major advantage of the Integra Classic is its space-saving design. The bins are nestable up to 51%, which means a lot of space can be saved during return transport. This makes the bin ideal for companies looking to optimize their storage space and reduce transport costs. When stacked, the bins remain stable, which is convenient for on-site storage.

For easy identification of the contents, the bin is equipped with label holders and textured zones for quick application and removal of labels. The smart lid design prevents loss of lids; when opened, they hang vertically. All of this contributes to efficient use of the bins. The bin is made from durable polypropylene (PP) and has a load capacity of 53 kg and a maximum static load of 400 kg. The solid base and walls provide extra strength, while the material withstands temperatures from -20°C to 40°C. This makes the bin suitable for various conditions, both indoors and outdoors.

With dimensions of 600 x 400 x 265 mm, the Integra Classic is a versatile solution for storage and transport. The combination of durability, space-saving, and easy handling makes this bin suitable for various sectors such as retail and logistics. The bins can be packed 64 units per pallet, contributing to efficient distribution and storage.
