Euro pallet CR1 ECO - 1200 x 800 mm - without rims - with antislip strokes

Product specifications

External (LxWxH)	1200 × 800 × 160 mm
Dynamic load capacity	1250 kg
Color	Black
Material	Recycled ECO-HDPE
Article number	83232242
Weight (kg)	16 kg
Temperature range	-30°C to +40°C, briefly up to +90°C
Static load capacity	5000 kg
Load capacity in racks	1000
Quantity per pallet	15

Features

- **Very robust pallet for heavy-duty work - without reinforcement profiles in the deck**
- **Extra strong thanks to the angled connection between the skids and the blocks**
- **Pallet skids are chamfered on both sides for trouble-free handling**
- **Racking load capacity up to 1000 kg**
- **Wide anti-slip strips on the pallet deck**
- **Recesses in the pallet rim for lashing straps to prevent shifting**
- **With profiled corner blocks for better grip of stretch and wrapping film**
- **Made from high-quality ECO regranulate: suitable for packed food products**
- **Blocks closed at the underside**
- **Profiled, reinforced pallet skids**
- **No raised rims all around**
- **Marking, logos or numbering on request; position to be agreed**
- **Options: Pallet lid / pallet cover - fit-on rims - QR codes and barcodes - fully integrated metal inserts - RFID transponders**

Description

Our CR1 Euro pallet is designed as a reliable and functional solution for general logistics applications in the heavy-duty segment. With dimensions of 1200 x 800 x H 160 mm and a particularly robust construction, this pallet provides a solid base for transport and storage - wherever high requirements apply.

Safety is central to the CR1 design. Because there are no raised rims, the pallet deck is fitted with wide anti-slip strips to keep loads and empty pallets securely in place. The recesses in the pallet rim are useful for fastening lashing straps safely and preventing load shifting during transport.

The pallet is equipped with 3 robust longitudinal skids, closed blocks on the underside and profiled skids. These features provide sufficient load capacity and trouble-free handling when moving different types of loads.

With a static load capacity of 7500 kg, a dynamic load capacity of 1250 kg and a racking load capacity of 1000 kg, this CR1 offers more than enough strength for most logistics applications - even without reinforcement profiles in the deck.

This CR1 version is made from ECO regranulate: a high-quality recycled material with excellent material properties at an attractive price.

In short, the CR1 Euro pallet is a robust and functional pallet for a wide range of logistics applications. If we have sparked your interest, please contact us - we will be happy to arrange a demonstration.
