## Description

H1 variant in a blue colour (approx. RAL 5002) to clearly distinguish different goods flows, departments or applications.
Our H1 pallet is almost identical to the EURO H1. The only difference is that the locating cross on the deck is omitted. Because the pallet deck is completely flat, this H1 variant is widely used in combination with packaging, cartons and bagged goods. However, no compromises are made in terms of hygiene and cleanability. The H1 pallet also features a fully closed and smooth underside of the skids and blocks, leaving no opportunity for dirt from the floor to accumulate.
This pallet variant is also produced from high-quality virgin HDPE and is suitable for direct food contact. This additionally ensures high impact resistance and trouble-free use in freezing environments.
