

Fish box 25 kg - with drain holes

Product specifications

External (LxWxH)	800 x 400 x 225 mm
Internal (LxWxH)	670 x 340 x 180 mm
Capacity	40 liter
Handles	Open
Sidewalls	Closed
Material	HDPE
Article number	81650300
Weight (kg)	2,6 kg
Temperature range	-30°C to +40°C, briefly up to +90°C
Color	Blue
Bottom	Sloping base with four drain holes and sideways outlet in top rim

Features

Fish crates are stackable and nestable.

The nesting principle of the fish crates saves up to 76% space.

Equipped with arrow markings as visual stacking-nesting aid.

The standard Euro norm size of 800 x 400 mm provides logistical advantages during transportation and storage.

For a matching mobile base and plastic Euro pallet, see "Accessories" and "Related products".

Featuring a roof-bottom construction with 4 drainage holes and lateral discharge in the upper edge.

Extremely robustly designed for a long lifespan.

Description

Fish crate with drainage holes, dimensions 800 x 400 x H 225 mm. Designed for the safe and hygienic storage and distribution of fresh fish. The fish crate is equipped with an efficient drainage system. The drainage holes are located in the closed base at each of the four corners, allowing meltwater and slime to drain away and preventing these substances from entering the fish crate below. This helps ensure the optimal quality, freshness, and appearance of the fish. The stack-and-nest fish crate is manufactured from food-grade plastic. When empty, the crates can be nested, resulting in space savings of up to 76%. Arrow markings on the upper rim indicate the correct nesting position.

The fish crate has a capacity of 40 litres and a load capacity of 25 kg. These fish crates are perfectly compatible with Euro pallets; exactly three fish crates measuring 800 x 400 mm fit on a standard Euro pallet. The fish crates are equipped with a provision for transponders. RFID chips are available upon request. For more information about these transponders, please contact our product specialists.
