Product specifications

External (LxWxH)	600 × 400 × 154 mm
Internal (LxWxH)	568 × 368 × 140 mm
Capacity	29.3 litre
Color	Grey
Handles	Open (four openings)
Sidewalls	Perforated
Material	HDPE
Article number	30.115.4x6.UO
Weight (kg)	2,1 kg
Temperature range	-30°C to +40°C, briefly up to +90°C
Bottom	Perforated, reinforced
European Article Number	7424941421497
Maximum glass height	125
Maximum Ø glass	85
Quantity per pallet	60
Stacking height (mm)	143

Features

The glass dimensions determine the choice of the crate. Measure the height of the glass and the diameter at the widest point.

Euronorm crate for rinsing, storage, and transporting glassware. The glass crate with a double compartment accommodates 24 glasses with a maximum height of 125 mm and a maximum Ø of 85 mm. Glassware dimensions are crucial in selecting the appropriate glass crate. If the glass is taller than 125 mm or much narrower than Ø 85 mm, this crate is not suitable. Check other glass crates in this series for a better fit.

This crate has Euronorm size 600 x 400 mm and is 154 mm high. The glass crate with a double compartment accommodates 24 glasses and is highly suitable for glasses with a base. The most vulnerable part of a glass is its base. In this glass crate with upper and lower compartmentalization, this part of the glass is optimally supported and protected. If transporting cups or tumbler glasses, a glass crate with a single compartment is also suitable. Glassware is thoroughly clean after washing in the glass crate. The coarse perforated side walls and bottom allow the rinse water and cleaning agent to access the glassware efficiently, resulting in a clean wash.

Glasses do not touch each other, ensuring optimal protection during storage, transportation, and cleaning in dishwashers.

Euronorm-sized glass crates are perfectly combinable with other plate racks and stacking crates with Euronorm dimensions. Glass crates can be stacked without losing space on standardized bases, rolling containers, and pallets. For more information, contact our product advisors.

Description

Please note - before ordering!

The dimensions of the glass determine the choice of crate and compartment division. Measure the exact height of the glass and the diameter at its widest point.

Plastic glass crate in **Euronorm format** (600 x 400 x H 154 mm). Finished in **grey** and part of the successful **BASIC LINE**. The glass crate is suitable for **24 glasses** or tableware with a maximum **height of 125 mm** and a **maximum Ø of 85 mm**. The glass crate is highly suitable for efficient storage and safe transport of glassware and tableware. In addition, the crate can be used in suitable dishwashers to clean the glassware. **One crate** therefore for **storage, transport and cleaning**.

Thanks to the **standardised dimensions** (600 x 400 mm), the stacking bin is **stackable with all other Euronorm stacking bins** (including plate crates or cutlery bins) and **perfectly compatible** with **standardised pallets** and **mobile plastic trolleys** or **roll containers**. This makes logistics efficient and **without loss of space**.

Application

The glass crate is fitted with a 24-compartment division, both at the top and at the bottom. The crate therefore provides 24 individual positions for glasses and, for example, cups. The tableware does not come into contact with each other and is therefore optimally **protected against scratches and breakage** during cleaning, storage and transport. **Rinse water** and **drying air** have **easy access** to the contents of the crate thanks to the coarsely perforated side walls and base. The glassware is therefore completely clean after washing in the glass crate.

The BASIC LINE is mainly used by rental companies, in the hospitality industry and by catering companies. Associations and company canteens are also satisfied users of this product range.
