- **Made from food-safe plastic for direct contact with unpackaged food**
- **With hinge pins on one long side and provisions for fitting snap closures on the other long side**
- **Options: printing - snap closures**

Description

Plastic hinged lid (300 x 200 mm), suitable for SOLID LINE stacking bins with dimensions of 300 x 200 mm. SOLID LINE stacking bins remain stackable with each other, even with the lid fitted.

Assembly

The lid is fitted with two hinge pins on one side. These can easily be slid into the slots located in the upper rim of the bin - on both long sides. The lid is clicked into place in a horizontal position and can also be removed again in this position if required.

Accessories

Stainless steel hinge reinforcements are available to strengthen the plastic hinge and can be fitted by us directly when ordering if required. Once stainless steel hinge reinforcements have been fitted, the lid can no longer be removed without damaging it.
Snap-slide closures can be fitted on the other long side - opposite the hinges. This prevents the lid from opening unintentionally. These snap closures can also be fitted by us before delivery.
