Product specifications

External (LxWxH)	1200 × 1000 × 160 mm
Dynamic load capacity	1250 kg
Color	Grey
Material	HDPE
Article number	83180801
Weight (kg)	22 kg
Temperature range	-30°C to +40°C, briefly up to +90°C
Static load capacity	5000 kg
Edge height	7 mm
Load capacity in racks	850
Quantity per pallet	15

Features

- **Hygienic food pallet made from food-grade plastic**
- **Fully through openings in the pallet deck for ventilation and moisture drainage**
- **With 3 heavy-duty longitudinal pallet skids**
- **Completely smooth and closed underside of blocks and skids**
- **Extra strong angled connection between blocks and skids**
- **7 mm raised rims all around the deck for centring empty pallets and loads**
- **Highly suitable for use with stacking bins**
- **Easy to clean**
- **Marking, logos or numbering on request; position to be agreed**
- **Options: Pallet lid / pallet cover - fit-on rims - pallet wedges - QR codes and barcodes - RFID transponders - Palgrip anti-slip under the skids - welded skids - ESD version**

Description

Our H3 industrial pallet was developed as a hygiene pallet specifically for the food sector. For this purpose, an open pallet deck was designed to allow ventilation and moisture drainage. The openings in the deck run all the way through, so nothing can remain trapped inside the pallet. All pallet parts that come into contact with the floor are fully closed. Both blocks and skids are sealed on the underside, leaving no opportunity for dirt to accumulate.

In addition to hygiene, robustness is a key requirement in the food sector. Pallets are heavily used and a long service life is essential. These were the guiding principles in the design of the H3. The result is a highly impact- and shock-resistant pallet that has more than proven itself in practice. Thick soles under the blocks and skids, angled and reinforced connections between skids and blocks, and the use of flexible virgin plastic provide the guarantee of long-term durability.

The H3 pallet has a racking load capacity of 850 kg, making it a medium-duty pallet.

The H3 is the ISO variant of the EURO H1 pallet, which is now used as a pool pallet across Europe. The product quality of both pallets is widely praised. Both pallets have become indispensable to day-to-day operations throughout the European food sector.
