Storage bin type Modular bin 9070 - 600 x 230 x H 150 mm - system bin - blue (PU = 10)

Product specifications

External (LxWxH)	600 x 230 x 150 mm
Internal (LxWxH)	525 x 208 x 140 mm
Capacity	17 liter
Sidewalls	Closed
Material	PP
Article number	9070.000.623
Weight (kg)	0,86 kg
Temperature range	-20°C to +50°C, briefly up to +90°C
Color	Blue
Bottom	Closed
Quantity per pallet	80

Features

Modular bin plastic Storage bin type 9070.
Dimensions: 600 x 230 x 150 mm (l x w x h) - 17 liter

Part of a modular system of Storage bins - forming one complete unit together. Length sizes 300-400-500-600 mm

Equipped with a generous hand hole at the front

Internal dimensions: 570/525 x 208 x 140 mm (l x w x h)

Available with both cross dividers and longitudinal dividers - for compartment division

The longitudinal divider creates two compartments next to each other of approx. 100 mm each

The cross dividers create four compartments one behind the other of approx. 130 mm each

With closed walls and base

Flared walls - for optimum volume

With label area at the front

Modular bins are stackable with each other - with centring lugs to prevent shifting

The hanging edge at the rear allows mounting on rails

Made from impact-resistant polypropylene plastic (PP) - for intensive use

The PP plastic is food-grade - for direct food contact

The PP plastic used is flexible and low-noise - for a quieter workplace

Largely resistant to chemicals and common cleaning agents

Our Modular bins are system bins - designed to organise a storage space systematically

Options: label incl. protective film - transparent front flap - cross dividers - longitudinal dividers - colours

Description

Our Modular bin type 9070 with dimensions 600 x 230 x 150 mm is part of a modular system of Storage bins that together form one complete unit. With a length of 600 mm, this compact plastic bin fits perfectly on standard shelving, racks or workbenches, ensuring that the available space is used efficiently.

Made from impact-resistant polypropylene plastic (PP), this Storage bin is robust, durable and suitable for intensive use. The material is also weather-resistant and resistant to chemicals, making the bin suitable for industrial use in production, assembly, logistics and maintenance. In addition, the PP plastic used is food-grade, which is why the food sector, pharmaceuticals and the chemical industry also make extensive use of our Modular bins. Thanks to the use of flexible PP plastic, Modular bins are also low-noise in use - for a calm working environment.

The practical design makes this plastic Storage bin easy to handle. The generous hand hole ensures that the contents are easy to reach. Modular bins can be stacked securely with each other. The integrated hanging edge at the rear also makes the bin suitable for standard rail systems, creating clear vertical storage. This combination of stackability and hanging options saves space and increases efficiency in a warehouse or workplace.

Modular bins with a length of 600 mm can be fitted with a longitudinal divider that divides the available width into two sections of approx. 100 mm each, positioned next to each other. Alternatively, three cross dividers can also be fitted, dividing the bin into four compartments of approx. 130 mm each, positioned one behind the other.

The variety of colours of the modular bins supports clear colour coding, making it easy to pick different products or parts. Whether you stack several bins on top of each other or organise them horizontally on a workbench, this storage bin provides a clear overview and prevents products from getting lost. The bin is therefore not only ideal for industrial applications, but also perfect for office organisation, hobby rooms or workplaces where efficiency and clarity are important.
