

Mushroom crate 400x300x110mm blue

Product specifications

| | |
|----------------------------|--------------------|
| External (LxWxH) | 400 × 300 × 110 mm |
| Capacity | 13.2 liter |
| Sidewalls | Perforated |
| Material | PP |
| Article number | 768.101.101 |
| Weight (kg) | 0,2 kg |
| Temperature range | -20 to +80 °C |
| Color | Blue |
| Bottom | Perforated |
| Max. load capacity per box | 3 kg |

Features

The mushroom crate is lightweight and easy to handle.

It is made from high quality polypropylene (PP) for optimal durability.

The crate provides high strength despite its low weight.

It is suitable for intensive use and repeated transport.

It offers an efficient solution for logistics in mushroom cultivation.

Description

Mushroom crate lightweight and durable for mushroom cultivation

This mushroom crate is specially developed for use in mushroom cultivation and provides an efficient solution for collecting, transporting and handling freshly harvested mushrooms. The crate fits seamlessly into the logistics processes of mushroom farms and processing facilities.

The crate is made from high quality polypropylene (PP). This material is known for its low weight, excellent dimensional stability and durability. As a result, the crate remains lightweight while maintaining high strength and reliability. The reduced weight also contributes to lower transport costs, lower fuel consumption and more efficient use of raw materials.

With dimensions of 400 × 300 × 110 mm and a weight of approximately 200 grams, the crate is easy to handle during harvesting and transport. It is designed for intensive use and can easily be integrated into existing logistics systems within the mushroom industry. By combining low weight with high strength and durability, this mushroom crate offers an efficient solution for companies that value product quality, ease of handling and sustainable logistics.
