Description

Robust plastic stacking crate in **Euronorm format (400 x 300 x H 193 mm** - 18,2 liter) and part of our **RX series** - a product range used in a wide variety of applications. Users are found in industry and craft sectors, as well as in the fruit and vegetable sector and food processing. In addition, the crate is widely used as a **bicycle crate**.

Thanks to the **standardised dimensions** (400 x 300 mm), the stacking crate is **stackable with all other Euronorm stacking crates and bins**. The crate is **fully perforated**, meaning both the walls and the base are perforated. This allows rainwater to drain away easily.

The stacking crate is food-safe, has a **hygienic design** and is fitted with two practical open handgrips. The base is **reinforced on the underside** for optimal load capacity.

Thanks to the openings in the base, the crate can be easily mounted on a suitable bicycle rack or front carrier. This makes the crate ready for use as a **bicycle crate** for safe and comfortable transport by bicycle.
