Description

Stack-nestable bin in Euronorm format (600 x 400 x H 180 mm - 32 liter) from the **TELLUS series**. Fitted with **closed recessed handgrips**, featuring a **stack/nest indicator** as an additional aid. The sturdy **recessed handgrips** are particularly user-friendly and not only provide a secure grip, but also contribute to easy handling when loaded. The bins have a particularly smooth, **easy-to-clean** design. The underside of the base is also flat and smooth, preventing dirt from accumulating there. This area is therefore also easy to clean, helping to ensure good **hygiene**.

Application

Because TELLUS bins are stackable and nestable, they can be used particularly efficiently. When **loaded**, they can be stacked to make optimal use of **warehouse space** or **production space**. When **empty**, TELLUS bins can be nested, allowing **return transport** or empty storage to take place efficiently and in a **space-saving** manner.

TELLUS bins provide an excellent solution for a wide variety of storage requirements. They are not only functional, but also durable and versatile for use in different environments - particularly in the **food industry**.
