## Product specifications

| | |
|---|---|
| External (LxWxH) | 300 × 230 × 150 mm |
| Internal (LxWxH) | 225 × 208 × 140 mm |
| Capacity | 8 litre |
| Color | Orange |
| Sidewalls | Closed |
| Material | PP |
| Article number | 9067.000.316 |
| Weight (kg) | 0,5 kg |
| Temperature range | -20°C to +50°C, briefly up to +90°C |
| Bottom | Closed |
| Max. load capacity per box | 15 kg |
| Max. static stacking load | 75 kg |
| Quantity per pallet | 192 |

## Features

- **Modular bin plastic Storage bin type 9067. Dimensions: 300 x 230 x 150 mm (l x w x h) - 8 liter**
- **Part of a modular system of Storage bins - forming one complete unit together. Length sizes 300-400-500-600 mm**
- **Equipped with a generous hand hole at the front**
- **Internal dimensions: 270/225 x 208 x 140 mm (l x w x h)**
- **Available with both cross dividers and longitudinal dividers - for compartment division**
- **With closed walls and base**
- **Flared walls - for optimum volume**
- **With label area at the front**
- **Modular bins are stackable with each other - with centring lugs to prevent shifting**
- **The hanging edge at the rear allows mounting on rails**
- **Made from impact-resistant polypropylene plastic (PP) - for intensive use**
- **The PP plastic is food-grade - for direct food contact**
- **The PP plastic used is flexible and low-noise - for a quieter workplace**
- **Largely resistant to chemicals and common cleaning agents**
- **Our Modular bins are system bins - designed to organise a storage space systematically**
- **Options: label incl. protective film - transparent front flap - cross dividers - longitudinal dividers - colours**

## Description

Our Modular bin type 9067 with dimensions 300 x 230 x 150 mm is part of a modular system of Storage bins that together form one complete unit. With a length of 300 mm, this compact plastic bin fits perfectly on standard shelving, racks or workbenches, ensuring that the available space is used efficiently.
Made from impact-resistant polypropylene plastic (PP), this Storage bin is robust, durable and suitable for intensive use. The material is also weather-resistant and resistant to chemicals, making the bin suitable for industrial use in production, assembly, logistics and maintenance. In addition, the PP plastic used is food-grade, which is why the food sector, pharmaceuticals and the chemical industry also make extensive use of our Modular bins. Thanks to the use of flexible PP plastic, Modular bins are also low-noise in use - for a calm working environment.
The practical design makes this plastic Storage bin easy to handle. The generous hand hole ensures that the contents are easy to reach. Modular bins can be stacked securely with each other. The integrated hanging edge at the rear also makes the bin suitable for standard rail systems, creating clear vertical storage. This combination of stackability and hanging options saves space and increases efficiency in a warehouse or workplace.
The specific colour of the Modular bins supports clear colour coding, making it easy to organise different products or components. Whether you stack several bins on top of each other or organise them horizontally on a workbench, this Storage bin provides a quick overview and prevents products from getting lost. This makes the bin not only ideal for industrial applications, but also perfect for office organisation, hobby rooms or workplaces where efficiency and clarity are important.
