Transport bin 400 liter - 945 x 725 mm - nestable - on feet - green

Product specifications

External (LxWxH)	945 × 725 × 830 mm
Internal (LxWxH)	875 × 695 × 705 mm
Capacity	400 litre
Color	Green
Sidewalls	Closed, smooth
Material	HDPE
Article number	81011520
Weight (kg)	17,4 kg
Temperature range	-30°C to +40°C, briefly to +90°C
Bottom	Closed, smooth
Quantity per pallet	8

Features

- **Transport bin 400 liter - colour green**
- **For general use in warehouses, production companies and agricultural businesses**
- **With hot-dip galvanised rim reinforcement on both long sides - for use with liquids (e.g. rainwater)**
- **Nestable design.**
- **With seamlessly smooth walls and base - without external ribs**
- **Fitted with 4 feet - closed and smooth on the underside**
- **Easy to clean thanks to the smooth inner and outer walls**
- **User-friendly thanks to the high degree of rounding**
- **Resistant to most chemicals and common cleaning agents**
- **UV- and weather-resistant - freeze-resistant down to -30°C**
- **Nested stack height: 198 mm - stacked height: 830 mm**
- **With 1" outlet provision on one short side fitted with a screw cap**
- **Options: drop-on lid - mobile dolly - wheels instead of feet (note: not liquid-tight) - 1" or 2" ball valves - extension feet**

Description

Large-volume bin with a seamlessly smooth and easy-to-clean design. Widely used for agricultural applications, in warehouses at production sites and even as a rainwater reservoir in gardens.

The construction

This 400 litre transport bin is made of homogeneous HDPE plastic and has very thick walls. This makes external ribs unnecessary - both on the walls and the base. The result is an exceptionally easy-to-clean bin. In addition, the inside is also extremely smooth and rounded, making it easy to empty and excellent to clean here as well. The top of the bin is externally reinforced with two hot-dip galvanised steel profiles, allowing the bin to be used with liquids too - for example for collecting rainwater.

Use

This transport and storage bin is used for a wide range of applications. Wherever smooth walls are valued so that contamination has no chance. Mobility of the bin is possible thanks to the 4-foot design. When empty bins need to be stored, they can be nested to save space - we call this "nested". The lid also ensures safe storage of the contents.
