Article number	81881711.PET
Weight (kg)	14 kg
Quantity per pallet	13

Features

The waste container is fitted with two wheels Ø 200 mm, with rubber tread.

Availiable in different colours.

Description

Mobile brown 240-liter container with an entry opening in the lid. Designed for the collection of empty PET bottles and deposit cans. The official small bag available from the wholesaler fits perfectly into this collection container. You can easily hang this small bag collection sack in the container. Thanks to the entry opening, the lid does not need to be touched or opened when depositing the PET bottle, providing a hygienic solution for collection containers in company canteens, schools, and institutions. The collection container is lightweight and easy to move with ergonomically designed handles. Text or logo printing is available upon request. Examples of prints include 'Deposit your empty PET bottle here' or 'Deposit your PET bottle and support your football club.' When ordering, choose the printing option, and we will contact you. The small bags for use in the collection container are available for free from your beverage wholesaler. The mini bags are delivered with a sealing strip. Full collection bags are sealed with a strip, labeled with a barcode, and handed over to the beverage wholesaler's driver. They handle the logistics of the returned PET bottles. Statiegeld Nederland is responsible for the counting and administrative processing of the deposit bottles. The returned deposit bottles are recycled.
